Experience – (5 years and 3 months)

UX Designer - signRouts Technologies (Jul 2007 to Present) | Bangalore – India

Joined as working partner and developed intranet by administering linux as server and configuring samba with users. Initiated project management by open source application. Also Involved in developing and customizing the themes for wordpress and drupal. Responsibilities include complete UI and IA redevelopment of dynamic websites by applying user-centered design. These multidisciplinary experience drives my passion to grow as a user experience designer.

Web Developer – Younix Computers (Dec 2006 to Jun 2007) | Cochin – India

Responsible with creating web sites for both internal use and customer use using PHP and My SQL. Designed, developed & customized Content Management System (CMS) for product development and expanded web marketing strategies.

Web Designer– Onyx Software & Web Solutions (Oct 2004 to Jan 2006) | Calicut – India

Starting my career in the marketing division dealing with web site sales and client accounts. I was involved in designing websites with graphic design and updating contents. I have a good sense in aesthetics that supplies to advertising and marketing oriented mind. This provided me an opportunity to enter into the web world with marketing skills and SEO.
